

Supplementary Table 2. The effect of temperature during establishment of infection of *Nicotiana benthamiana* by potato virus Y-O (PVY-O) or potato virus A (PVA), and infection of *Physalis floridana* by potato leafroll virus (PLRV).

Virus	No. of plants tested	Rate of plants infected with each virus (%)				
		10 °C	15 °C	20 °C	25 °C	30 °C
PVY-O	75	15±2.9	15±2.9	23±4.5	24±4.8	19±3.8
PVA	45	9±3.4	29±1.3	18±1.3	24±1.3	9±2.6
PLRV	41	48±9.5	67±3.7	73±2.2	85±4.5	71±1.2
